Summary

Senior QA Automation Engineer with 8+ years of experience delivering scalable test automation solutions across E-Commerce, Banking, and Reinsurance domains. Expertise in Playwright, Cypress, Selenium, TypeScript, JavaScript, API Automation, and GitLab CI/CD. Proven experience designing maintainable automation frameworks using Page Object Model (POM), Fixtures, Parallel Execution, and API Testing strategies. Leverages AI-assisted development tools including GitHub Copilot, ChatGPT, and Claude to accelerate test development, debugging, code reviews, and productivity. Strong background in Agile delivery, quality engineering, and continuous testing practices.

Skills

Test Automation : Playwright , Selenium , Cypress, Test Automation Framework Development, End-to-End Testing, Regression Testing, Smoke Testing, Functional Testing, Integration Testing, Cross-Browser Testing'

Programming Languages : TypeScript, JavaScript, Java

API Testing : REST API Testing, Playwright API Testing, API Validation, Backend Testing

CI/CD & Version Control : GitLab CI/CD, GitHub, Bitbucket, Continuous Integration (CI), Continuous Testing (CT)

AI-Assisted Engineering : ChatGPT, Claude Opus, GitHub Copilot, AI-Assisted Test Case Generation, AI-Assisted Automation Development, Prompt Engineering, AI-Assisted Debugging & Root Cause Analysis

Test Management & Agile Methodologies : JIRA, TestRail, Agile, Scrum, SDLC, STLC, Defect Lifecycle Management, Test Planning & Execution

Development & Testing Tools : Visual Studio Code, IntelliJ IDEA, Eclipse IDE

Design Patterns : Page Object Model (POM) , Behaviour-Driven Development (BDD), Hybrid Framework Design, Playwright Fixtures, Parallel Test Execution, Reusable Component Architecture

Domain Expertise : E-Commerce, Financial Services, Banking, Reinsurance, Enterprise Web Applications

Education

Bengal College of Engineering and Technology, Durgapur

B.Tech - Computer Science & Engineering, CGPA: 7.04

Aug 2017

Experience

HCLTech

Senior Technical Lead

May 2025 - Present | Kolkata, West Bengal

- Designed and implemented a scalable Playwright automation framework using TypeScript, improving test maintainability and reducing script creation effort by approximately 40%.
- Automated 100+ regression and smoke test scenarios, reducing manual execution effort by approximately 50%.
- Increased automated test coverage from approximately 45% to 80%, improving release confidence and defect detection.
- Integrated automation execution into GitLab CI/CD pipelines, reducing feedback cycles from hours to minutes and enabling continuous testing.
- Reduced regression execution time from 2 days to less than 4 hours through parallel test execution and framework optimization.
- Performed REST API automation testing for critical backend workflows, improving validation accuracy and reducing production defects.
- Leveraged ChatGPT, Claude Opus, and GitHub Copilot for test case generation, automation development, debugging, and code optimization, accelerating automation delivery by approximately 25–30%.
- Collaborated with developers, DevOps engineers, product owners, and business analysts in Agile Scrum teams to deliver high-quality releases.
- Mentored automation engineers and promoted framework standardization across the project.
- Environment: Playwright, TypeScript, REST API Testing, GitLab CI/CD, GitHub, Agile, Scrum, JIRA, TestRail, ChatGPT, Claude Opus, GitHub Copilot

Infosys

Quality Engineering Analyst

Jan 2022 - Apr 2025

- Developed and maintained automation frameworks using Playwright, Cypress, and Selenium WebDriver.
- Automated more than 150 business-critical test scenarios, reducing repetitive manual testing effort by approximately 60%.
- Improved regression suite execution efficiency by approximately 40% through framework enhancements and test optimization.
- Increased automation coverage by approximately 35%, improving overall release quality and stability.
- Performed functional, regression, integration, and API testing across multiple application releases.
- Integrated automated test execution into CI/CD workflows, supporting faster release validation.
- Reduced defect leakage into production through early automation validation and continuous testing practices.
- Utilized ChatGPT and GitHub Copilot to accelerate test script development, test data generation, and troubleshooting activities.
- Collaborated with development teams to identify root causes and resolve critical defects before production deployment.
- Managed defect tracking and test reporting using JIRA and TestRail.
- Environment: Playwright, Cypress, Selenium, TypeScript, JavaScript, Java, REST API Testing, GitLab CI/CD, JIRA, TestRail, Agile, ChatGPT, GitHub Copilot

Tata Consultancy Services

System Engineer

Mar 2018 - Dec 2021

- Executed manual and automation testing activities across multiple enterprise web applications.
- Developed Selenium WebDriver automation scripts using Java, reducing repetitive manual testing effort by approximately 30%.
- Created and maintained comprehensive test cases, test scenarios, and execution reports.
- Performed functional, regression, integration, and user acceptance testing.
- Identified and reported critical defects, contributing to improved application stability and user experience.
- Conducted cross-browser testing across Chrome, Firefox, Edge, and Internet Explorer environments.
- Supported release validation and post-production verification activities for multiple deployments.
- Contributed to automation adoption initiatives, improving overall testing efficiency and consistency.
- Environment: Selenium WebDriver, Java, JIRA, Agile, SDLC, STLC

Certifications & Professional Training

- ISTQB Certified Tester Foundation Level (CTFL) | UK Testing Board (UKTB) | July 2019
- Playwright Automation Testing
- Selenium WebDriver Automation
